

Recycle Your Vinyl in 4 Easy Steps:

1.

GATHER YOUR VINYL SIDING SCRAP

Minimize jobsite waste. Load new and used vinyl siding scrap into your truck instead of throwing it in the dump.

2.

DROP OFF YOUR VINYL SIDING SCRAP

Your local Kaycan branch will be accepting your used or unused vinyl siding and will return it to their manufacturing facility.

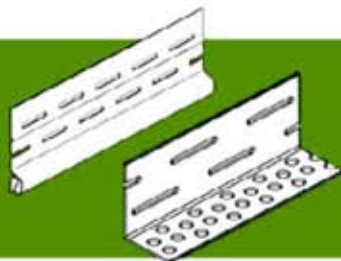

3.

RECYCLED VINYL IS PROCESSED AT THE MANUFACTURING FACILITY

The scrap is cleaned and ground down into fine granules which can be melted down to create new products

4.

PROCESSED VINYL CREATES NEW PRODUCTS

Vinyl siding scraps will be repurposed into accessories such as starter strips and anti-rodent trims.
